Minor Subdivision and Large Lot Division Approval may be granted upon meeting the requirements specified in Mercer County Subdivision Regulations Sections 1113 and 1118, respectively. Some of these requirements are summarized below:

1. The minimum required acreage and lot width for minor subdivisions and large lot divisions are met. These criteria are dependent on intended use and access to public sewer and water. See the table on the following page for required minimum lot size and width. Note that lot areas may be increased by recommendation of the County Health Department.
2. Soil testing has been conducted or access to central sanitary sewer has been confirmed.
3. Site has adequate drainage for development.
4. The survey plat has been approved and signed by the township zoning officer (if applicable).
5. The proposed subdivision is along an existing public road and involves no opening, widening, or extension of any street or road.
6. No more than 5 lots, any of which is less than 5 acres, can be subdivided from the original tract. The remaining or parent tract is included in number of subdivisions allowed per tract.

^a The depth to width ratio of a proposed parcel cannot be greater than 3:1, where the width of a parcel is measured along road right-of-way line. Flag lots are not generally permitted.

^b For minor subdivisions, lots which are less than 5 acres in size, the lot area is *exclusive* of road right-of-way. For large lot divisions, lots which are 5 acres in size or greater, the lot area is *inclusive* of road right-of-way. Lot areas may be increased by recommendation of the Mercer County Health Department.

Note: If exceptional topographic or other physical conditions exist that prevent a proposed parcel from meeting these regulations, a variance from the Regional Planning Commission may be requested.
